SKILLS

Technical skills – React JS, JavaScript, Firebase, Bootstrap, Redux, Axios, Version control, Git, GitHub, Tailwind CSS, Html, CSS

Personal skills – Strategic Planning, Analytical Skills, Decision Making, Interpersonal Skills, Team Management & Communication skills.

KEY PROJECTS

Bookworm (eCommerce Store for Books)

Live url: <https://bookwormd.netlify.app/>

- Crafted a feature-rich online bookstore using **React JS**, integrating the **Google Books API** for robust searches, handling over 1000 requests.
- Implemented secure user authentication with **regex validation**, achieving a 95% success rate.
- Utilized **Redux** for persistent user data and cart storage, enhancing engagement and session continuity with local storage.
- Devised an adaptive UI strategy that provided seamless experiences on mobile, tablet, and desktop platforms; resulted in a 40% increase in user engagement and sustained session duration of over 3 minutes.

Invoiceer (generating invoices for clients)

Live url: <https://invoiceit.netlify.app/>

- Launched an invoice application with unique automated features built with React.js, capable of handling of 200+ invoices weekly; improved user experience through a streamlined interface, boosting team productivity and reducing manual entry errors.
- Enabled dynamic input for owner and client details with automatic calculation of item amounts and total sums, achieving 99% accuracy.
- Implemented features for adding, editing, and deleting items, enhancing control and flexibility.
- Provided functionality for previewing invoices and downloading them as **PDF** files, ensuring comprehensive document management.

Penny pilot (Expense tracker)

Live url: <https://pennypilot.netlify.app/>

- Developed an expense tracker application using **React.js**, enabling effective financial monitoring.
- Designed an interface for adding incomes and expenditures with entries dynamically displayed in a recent transactions list.
- Featured real-time balance calculation, prominently showcased at the top, providing instant financial insights.
- Optimized for performance, managing up to 500 transactions smoothly, maintaining instantaneous updates.

Bank application (credential for login dd-6342 rg-2222)

Live url: <https://dummybankd.netlify.app/>

- Built a comprehensive banking application using **React.js** to manage user accounts and transactions.
- Enabled tracking and performing transactions such as transfers and loan applications, processing up to 1,000 operations seamlessly.
- Incorporated real-time balance calculations and dynamic summaries, with instant updates upon user actions.
- Implemented secure login/logout features, automated logout timers, and account management, including closure.
- Designed an intuitive and responsive interface, providing a smooth experience across all devices.

EDUCATION

- | | |
|---|---------------------------------------|
| • Web Development Bootcamp (04/2024 - 08/2024) | Odin School |
| • Bachelors in Technology in Mechanical Engineering (2014 - 2021) | Rajasthan Technical University |

CERTIFICATION

- | | |
|---|--------------------|
| • Certified Web Developer
Certificate Id - ODIN1011067 verified at - https://go.odinschool.com/verify-certificate | Odin school |
